January 30, 2015

Effective May 1, 2015, Gentex will discontinue sales of all AC-only and continuous tone smoke alarms (except for the GN-300 smoke alarm). According to UL 217 (6th and 7th Edition), as of August 4, 2015, single and multiple-station alarms shall no longer be manufactured without a secondary power supply. NFPA 72 (2013), 29.6.1 reinforces this requirement.

Most of the industry has been aware of the August effective date for several years, and we have been planning accordingly. However, due to a last-time buy on some of the key components used on these alarms, as noted above, the effective dates do not align with each other.

Along with discontinuing the AC-only alarms, we are choosing to consolidate our product line to no longer offer continuous tone smoke alarms and system smoke detectors. The temporal 3 tone has become an industry standard, and is able to be used for both evacuation and relocation purposes. We will also continue to offer the GN-300 as a replacement for any continuous tone needs as long as our inventory allows.

As an additional feature to our ADA smoke alarms w/strobes, we will be adding the functionality of the CSX units in our existing 7139CS-C and 7139CS-W devices. The current CSX devices will be made obsolete (7139CSX-C and 7139CSX-W), and the functionality will be integrated into the current devices (7139CS-C and 7139CS-W). The ability to turn on the strobe from a field mounted relay will now be available in those devices, further simplifying our part number mix.

Gentex will continue to manufacture a full line of AC/DC alarms and detectors, as well as temporal 3 tone alarms and detectors. A complete cross-reference list follows this announcement.

After July 30, 2015, we will not be able to accept returns on the affected alarms unless it is an in-warranty situation. If you anticipate the need for these units for a new installation or for an existing job, please order them as soon as possible.

We would appreciate it greatly if you would extend this information to all your branches, purchasing, and sales people.

Thank you for your continued support.
